ONE
£850 RRP
The straightforward solution for notifying two-way radio, SMS and email. Message-in, message-out with a single stage alert.

ALERT
£1200 RRP
The intelligent notification functionality of the original module, with multiple inputs and three-stage escalation.

COMPLETE
£1500 RRP
The original and full solution, with incredibly easy set-up. Including Lone Worker protection.

CONNECT YOUR ALARMS
- Easily integrate with emergency and essential alarms, to deliver critical information.
- Simply connect to fire alarm systems, intruder alerts, BMS and technical/machine alarms.
- Connect, control and monitor access systems; open gates, barriers and doors from your two-way radio.

ALERT YOUR DEVICES
- Two-way radio - Hytera or Motorola DMR Radio.
- Smartphone SMS text message and Email.
- Workstation alert - Essential alarm notification pop-up on PC's and terminals, taking priority over the screens current contents.

ESCALATE YOUR WAY
- Build your own tailored three stage alert strategy.
- Send a key word text from your two-way radio, mobile phone or call button press to automatically start the alarm escalation.
- Automatically contact who you choose in the correct order of priority.

SAVE YOUR RESOURCES
- Full message detail, respond directly to the source of the incident in the quickest possible time.
- Discover false alarms, avoid unnecessary downtime and evacuation.
- No Licence fees.

LONE WORKER PROTECT YOUR TEAM
- Protect your workforce that work alone.
- Automatic 'alive checks' sent at regular intervals, no response and an alert is raised.
- Simple activity report.

Wi-Fi CALL BUTTON ALERT YOUR TEAM
- Smart, wireless call button. Simply send alerts and requests to Hytera and Motorola radios.
- Long and short press for different messages, with LED feedback ring to confirm the message has been sent.
